

# FDP-15

Product number: 17-0015-00

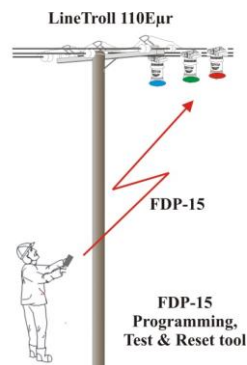

## Function Description

The FDP-15 can be used as a radio interface to a collector or fault indicator when sending configuration data to the unit.

FDP-15 have also a memory where parameters for different types of fault indicators and collectors can be stored. The memory can store one set of parameters for one type of field device of the following type;

- ✓ LineTroll R400D
- ✓ LineTroll 110Eµr
- ✓ LineTroll R110CG/CQ

**BEFORE YOU START USING FDP-15, MAKE SURE THAT NO OTHER DEVICES OTHER THAN THE DEVICE YOU SHALL COMMUNICATE WITH IS POWERED UP WITHIN THE COMMUNICATION RANGE. E.G HAVING TWO LINETROLL 110Eµr WITH SAME ADDRESS WILL CAUSE THE TRANSMISSION TO FAIL.**
